North American Solar System Engineering

Overview

What is North America Solar Academy?

“North America Solar Academy provides a comprehensive scope of understanding and knowledge about the solar industry and I would recommend this course for any individual or company looking to learn more about grid-tied and off grid solar system, Design, Installation for both rooftop and ground mounted solar system with safety measures.

Why did you take the North American Solar Academy course?

The North American Solar Academy course gave us a great overview of how solar systems are sold and installed, and to better understand what the pain points are for our customers when it comes to choosing a battery system. The course was a great investment.”.

Why did North American Solar Academy come to Kingston Ontario?

“North American Solar Academy came to Kingston Ontario to provide the 2-day course for thirteen employees at our organization. It would have been challenging to send this number of people to do the training out of town and it was much more economical to bring the training in-house.

Where are most solar energy companies based?

Most solar energy companies, including the one mentioned in the article, are based primarily in the US, with one project in Mexico.

Who is mainstream wind & solar?

As a successful developer of gigawatt-scale renewables platforms, Mainstream focuses on delivering large-scale onshore wind, offshore wind, and solar PV projects. The company has successfully delivered 6.6 GW of wind and solar generation assets to financial close-ready and has a net global pipeline of 23.9 GW.

Who makes solar panels?

However, some of the main manufacturers of solar panels in the US and globally are: 1. JinkoSolar – China 2. Hanwha Q-Cells – South Korea 3. Canadian Solar – Canada 4. SolarWorld Americas – USA 5. Trina Solar – China 6. SunPower – USA 7. Yingli Green Energy – China 8. REC Solar – Norway 9. JA Solar – China 10. Panasonic – Japan
