How do you know if a power inverter is good?

All it takes is some simple math to know if an inverter can handle what you want to plug in. Multiply the voltage (5 volts for USB, 12 volts for cigarette lighter, and 120 volts for an AC) by the amperage of your device to get the wattage. Compare that to the wattage rating of your power inverter, and

that'll tell you if it can handle the draw.
