

PDEOZE PowerContainer

Norwegian outdoor power supply foreign trade manufacturer

Overview

When did Norway introduce market-based power trading?

Norway introduced market-based power trading in 1991. Instead of planning a gradual transition to market-based solutions, as many European countries did, Norway opened the market to all customers from the very beginning. Hence, Norway was the first country to provide universal market access.

Does Norway have a power market?

Norway is part of a joint Nordic power market with Sweden, Denmark, and Finland, which in turn is integrated into the European power market through interconnections to the Netherlands, Germany, the United Kingdom, the Baltic states, Poland, and Russia.

How much power does Norway export a year?

Over the last ten years, the power balance has improved, and Norway has had an average net export of approximately 14 TWh per year. In 2024, total power exports amounted to 33.1 TWh, with power imports of 14.7 TWh. This results in a net electricity export of 18.4 TWh.

How do electricity contracts work in Norway?

In addition to the market price, the customer must pay a markup. Such contracts are the closest households and smaller businesses get to the day-ahead market. The Norwegian Consumer Council maintains a website, [www.konsumentradet.no](#), where it is possible to compare all the different contracts offered by electricity suppliers.

What are imports in Norway?

Create charts and tables with the figures you need. The information under «About the statistics» was last updated 27 August 2025. Imports comprise mainly foreign manufactured goods entering Norway. This can also include re-importation of originally Norwegian-produced goods and processed goods.

Why was Norway the first country to provide universal market access?

Hence, Norway was the first country to provide universal market access. The power exchange Statnett Marked AS (now Nord Pool AS) became an important element of the market. Even before this, fluctuating hydropower production in different parts of the country created a need for market-based solutions and electricity trading.
