Solar panel sizes are measured in two ways: watt output and physical dimensions. Physical dimensions refer to the height, length and width of the solar array. The wattage refers to how much power the panel can produce. Regular solar panels come in 60 cell panels or 72 cell panels. Each cell is 6 x.

The standard solar panel size typically contains either 60 or 72 cells. You can also find panels with as few as 32 solar cells on recreational vehicles, as well

as some larger commercial panels with as many as 96 cells. As for the actual footprint of the assembled panel, there are two key factors.
