Off-grid inverters for sale in Australia

Overview

Where can I buy an inverter in Australia?

Share contact information, store details, and brand content with your customers. Inverter.com.au is the online inverter store for Australia's best inverters. Suppliers of quality inverter, sine wave inverter, inverter charger, solar inverter and off grid solar systems, power inverter technology for over 20 years.

What is an off-grid solar inverter?

Off-grid solar inverters are such inverters that work efficiently without depending on the conventional utility grid. UTL's off-grid solar inverters don't require grid power to work.

Which inverters are suitable for my off-grid system design?

Off-grid system designs may include AC coupled solar, DC coupled solar, or a bit of both. This will inform the inverter type/s that are best suited to your unique system design. We always gain a full understanding of your power needs, both current and in the future, before recommending which inverters are suitable for your off-grid system design.

How much does an off-grid inverter cost?

An inverter converts direct current (DC) electricity into alternating current (AC) electricity. The price of an off-grid inverter will depend on the size of the system you have. A small 600 W inverter can cost you \$200 while a large 4,000 W inverter can cost you \$2,000. If we were to choose an AC refrigerator, this is the one we would choose.

How can off-grid energy Australia help you?

We can design your off-grid system with the inverters and controllers that are perfect for your needs and help you gain independence from the grid. Off-Grid Energy Australia utilise a variety of inverter technologies from leading

Australian and International suppliers to accommodate for a range of controller applications.

How reliable is off-grid solar power?

Off Grid Solar Power can be as reliable and affordable as being connected to the grid. With today's lithium battery technology combined with the new generation of solar battery system inverters and chargers, anyone can produce their own electricity, in any remote location.
