Overseas home energy storage boom

Overview

Global energy storage additions are on track to set another record in 2025 with the two largest markets – China and US – overcoming adverse policy shifts and tariff turmoil. Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

Overseas home energy storage boom

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

Sep 16, 2025 · A surge in global demand for energy storage solutions is fueling a boom for Chinese battery cell manufacturers, driven by the worldwide shift toward renewable energy ...

Jun 18, 2025 · The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as ...

Jun 18, 2025 · The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

Oct 17, 2025 · In the first half of 2025, the UK's grid-scale energy storage installations

increased by 14% year-on-year, while total storage capacity rose by 20%. According

Oct 24, 2021 · Let's face it--home energy storage isn't just about batteries anymore. It's about energy independence, dodging skyrocketing electricity bills, and even becoming a mini power ...

Apr 23, 2024 · The potential for the overseas energy storage market is immense and multifaceted. 1. Increasing demand for renewable energy, 2. Technological advancements in storage ...

Oct 21, 2025 · Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. ...

Feb 4, 2024 · Over the past two to three years, overseas customers have increasingly prioritized the economics and stability of electricity consumption, thanks to favorable policies in the ...

Why the Global Energy Storage Market Is Having a "Swiss Army Knife" Moment Let's face it: the overseas new energy storage industry is no longer just backup singers to solar and wind - ...

Sep 8, 2025 · The world is undergoing a transition to renewable energy, and carbon neutrality has become a long-term goal for many countries. During this process, household energy storage ...

Oct 2, 2025 · The overseas "order boom" of Chinese energy storage companies is essentially a mixture of structural opportunities with a short-term window effect.
