

PDEOZE PowerContainer

Peru power generation equipment container house

Overview

How is electricity used in Peru?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.

What is E-house (prefabricated electrical room) container?

E-House (prefabricated electrical room) Container is a prefabricated walk-in modular steel structure outdoor box that can accommodate medium voltage (MV) and low voltage (LV) switchgear and auxiliary equipment. It is often called PowerHouse or Power Distribution Center.

What is E-House container?

Efficient integration: E-House Container integrates professional equipment such as electrical, instrumentation, structure, HVAC, and fire protection, and ensures high integration and efficient operation through complete testing and manufacturing in the factory.

What is COSCO Shipping Chancay Peru terminal?

COSCO Shipping Chancay Peru Terminal, the Chinese shipping major's first green and smart port investment in South America, has commenced operation. Illustration purposes only. Courtesy of COSCO Shipping.

How will a direct container shipping route benefit South America?

By launching two direct container shipping routes connecting Shanghai and Chancay ports, the transit time for cargo from Peru to China will be reduced to just 23 days. Moreover, the introduction of a roll-on/roll-off (RoRo) service will facilitate the establishment of an automotive distribution center in South America.
