Overview

An 8 kilowatt (kW) solar panel system can help power your home while reducing monthly utility costs. In 2025, an 8 kW solar panel system costs around \$20,720 before incentives.

An 8 kilowatt (kW) solar panel system can help power your home while reducing monthly utility costs. In 2025, an 8 kW solar panel system costs around \$20,720 before incentives.

An 8 kW solar panel system is enough to power some homes—but it'll cost you about \$20,720. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

An 8kW solar system is a popular choice for many American homeowners seeking to significantly reduce their electricity bills and lower their carbon footprint. The cost of installing such a system varies based on several factors including equipment quality, location, labor fees, and government.
