

## **PDEOZE PowerContainer**

# **Price of base station energy storage system in India**

## Overview

---

The cost of battery energy storage system (BESS) is anticipated to be in the range of ₹2.20-2.40 crore per megawatt-hour (MWh) during 2023-26 for the development of the BESS capacity of 4,000 MWh, Parliament was informed on Thursday. How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

How much does a battery energy storage system cost in Rajasthan?

The Rajasthan Electricity Regulatory Commission (RERC) has accepted bids ranging from ₹2.21 lakh to ₹2.24 lakh per megawatt per month for a stand-alone Battery Energy Storage System (BESS) totalling 1,000 megawatt-hours (MWh).

Where is India's largest Bess battery energy storage system located?

India's largest BESS Battery Energy Storage System project, commissioned by SECI, is located in Rajnandgaon, Chhattisgarh. This solar plant in Chhattisgarh has a 100 MW solar PV plant with a 40 MW/120MWh battery energy storage system. For additional details, visit: [Press Release for Rajnandgaon Project](#).

How much will a battery energy storage system cost in 2023-26?

The cost of battery energy storage system (BESS) is anticipated to be in the range of ₹2.20-2.40 crore per megawatt-hour (MWh) during 2023-26 for the development of the BESS capacity of 4,000 MWh, Parliament was informed on Thursday.

Why are battery storage systems important in India?

In such situations, battery storage systems play a crucial role in providing a continuous flow of energy for homes and businesses. Today, the demand for

BESS in India is growing rapidly, especially in the solar industry, as more people realize its importance in ensuring reliable and efficient power supply.

Are stationary energy storage systems feasible in India?

e in India for behind-the-meter (BtM) applications. The levelised cost of storage is an important financial parameter indicating the feasibility of energy storage systems. While 12 different core services/applications of stationary energy storage can be identified in the power sector (Schmidt et al. 2019), we focus only on two of these applica

Jan 24, 2025 · Learn about Battery Energy Storage Systems (BESS) in India, their role in enhancing RE integration, and how they contribute to a more reliable and efficient power grid.

Jun 2, 2020 · Levelized Cost of Storage for Standalone BESS Could Reach INR4.12/kWh by 2030: Report Battery energy storage system based on low-cost lithium-ion batteries can enable India ...

Apr 28, 2025 · Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of ...

Dec 7, 2023 · The cost of battery energy storage system (BESS) is anticipated to be in the range of INR2.20-2.40 crore per megawatt-hour (MWh) during 2023-26 for the development of the ...

New Delhi , 08 May 2024 -- In a significant step forward for India's energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India's first commercial standalone Battery Energy ...

May 25, 2025 · India's energy transformation is entering its most disruptive phase. While solar tariffs made headlines a decade ago, a silent revolution is now underway in battery energy ...

Dec 13, 2023 · Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and ...

New Delhi , 08 May 2024 -- In a significant step forward for India's energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India's first ...

Jan 24, 2025 · Learn about Battery Energy Storage Systems (BESS) in India, their role in enhancing RE integration, and how they contribute to a more reliable and efficient power grid.

Jun 2, 2020 · Levelized Cost of Storage for Standalone BESS Could Reach INR4.12/kWh by 2030: Report Battery energy storage system based on low-cost lithium-ion batteries can enable India to meet the morning and evening ...

May 25, 2025 · India's energy transformation is entering its most disruptive phase. While solar tariffs made headlines a decade ago, a silent revolution is now underway in battery energy storage systems (BESS) -- and it's ...

Mar 28, 2025 · Discover the latest Battery Energy Storage Systems (BESS) in India. Learn how BESS solar solutions offer reliable and cost-efficient energy storage for homes and businesses in 2025.

Mar 28, 2025 · Discover the latest Battery Energy Storage Systems (BESS) in India. Learn how BESS solar solutions offer reliable and cost-efficient energy storage for homes and businesses ...

Jan 22, 2024 · OBJECTIVE AND SCOPE This status report aims to present a snapshot of the current and projected costs of energy storage in India for behind-the-meter (BtM) applications. ...

Jun 26, 2025 · Rajasthan has cleared another landmark for India's clean-energy transition, approving the country's lowest battery-storage tariff and paving the way for 1 gigawatt-hour ...

Dec 13, 2023 · Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched ...
