Price of high-quality solar modules in China and Europe

Overview

Solar module prices stabilize globally as China's TOPCon modules hold at \$0.087/watt, Europe sees a slight rise to €0.099/watt, and U.S. prices steady at \$0.285/watt amid ITC rush and anti-dumping rulings.

Solar module prices stabilize globally as China's TOPCon modules hold at \$0.087/watt, Europe sees a slight rise to €0.099/watt, and U.S. prices steady at \$0.285/watt amid ITC rush and anti-dumping rulings.

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index.

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. FOB China market The Chinese Module Marker (CMM), the OPIS benchmark assessment for TOPCon modules from China was assessed at \$0.093/W Free-On-Board (FOB).

On July 1, 2025, China's Central Financial and Economic Affairs Commission, in a high-level meeting, officially called for the "law-based governance of disorderly and low-price competition," with a clear directive to phase out outdated production capacity in an orderly manner. This marked the.

In the most recent tender, modules were priced as high as RMB0.75/W. Image: PV Tech. On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W.

April saw nuanced but key price shifts in the European solar market, with module prices rising due to supply constraints, while inverter prices continued to decline. The PV Purchasing Managers' Index (PMI) remained steady at 70. As stock shortages increase, partly due to China's shift towards.

Solar module prices stabilize globally as China's TOPCon modules hold at \$0.087/watt, Europe sees a slight rise to €0.099/watt, and U.S. prices steady at \$0.285/watt amid ITC rush and anti-dumping rulings. FOB CHINA: In the China Module Market (CMM), OPIS' benchmark assessment of China's TOPCon.

Price of high-quality solar modules in China and Europe

As the market struggles with low demand, these new record low prices highlight the ongoing challenges faced by Chinese solar module makers. Exported solar modules destined for Europe are confronting ...

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from ...

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

As of January 2025, solar module prices have remained relatively stable across all categories, including ultra-high-efficiency products and other module classes.

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W

In 2025, China launches a photovoltaic industry restructuring, stabilizing module prices and prompting European developers to adjust their procurement strategies.

In 2025, China launches a photovoltaic industry restructuring, stabilizing module prices and prompting European developers to adjust their procurement strategies.

Amid intense competition amongst module sellers and pressure to clear inventories,

module prices would continue to weaken towards the end of the year, the source ...

As of January 2025, solar module prices have remained relatively stable across all categories, including ultra-high-efficiency products and other module classes.

Amid intense competition amongst module sellers and pressure to clear inventories, module prices would continue to weaken towards the end of the year, the source added.
