Price of solar panel brand

Overview

A study by the Department of Energy's Lawrence Berkeley Laboratory found homes with solar panels sold for an average cost of around \$15,000 more than comparable homes without solar panels.

A study by the Department of Energy's Lawrence Berkeley Laboratory found homes with solar panels sold for an average cost of around \$15,000 more than comparable homes without solar panels.

Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor. After reviewing thousands of solar panels, we found that Maxeon offers the best solar panels. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make.

Choosing the best solar panels for your needs can be a complicated decision. You have to consider multiple factors, like price, performance, aesthetics, and warranty coverage—and don't forget, a warranty is only as good as the company that stands behind it. Luckily, our solar experts have.

Take a look at CNET's expert picks for the best home solar panels. The companies providing quotes may differ from those described in our independent reviews. Deals are selected by the CNET Group commerce team, and may be unrelated to this article. REC and Maxeon offer two of the best solar panels. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a home solar system cost?

In 2025, we surveyed 1,000 home solar customers across the U.S. to understand their experience shopping for and installing solar panel systems. Most homeowners said they paid around \$16,129 for a solar panel system, with an average of 14 solar panels installed.

Who makes the best solar panels?

Five brands stood out: Maxeon, VSUN, REC, Qcells, and Canadian Solar. What are the best solar panels?

Based on our analysis, Maxeon offers the best solar panels, followed by VSUN, REC, Qcells, and Canadian Solar. Each scored well overall, but the best one for you depends on your home's specific needs.

Are there cheaper solar panels on the market?

While there may technically be cheaper solar panels on the market, few can match the reliability and brand reputation of JA Solar. The combination of affordability and reliability makes JA Solar a compelling choice for homeowners looking for a cost-effective yet dependable home solar system.

How much does a Panasonic solar panel cost?

Panasonic earned an 8.4 rating out of 10 for customer service. However, out of all the solar panel manufacturers we reviewed in our survey, Panasonic Solar had one of the highest price tags, with an average cost of \$27,400. Keep in mind that this is customer-reported data, so you should always get a unique quote.

What is the most popular brand in residential solar?

Qcells is the most popular brand in residential solar thanks to quality equipment and pricing. SolarReviews statistics show that 58% of solar installers offered Qcells panels in the past year, but changes in the competitive landscape kept it at the 3rd place spot on our list.
