# **Romania Energy Storage Battery Production Project**

## Overview

---

Romania's Ministry of Energy has announced a €150 million funding program aimed at promoting the development of battery energy storage systems (BESS) across the country. The program, which will be financed through the Modernization Fund, is specifically targeting standalone storage facilities.

## Romania Energy Storage Battery Production Project

---

ENGIE Romania aims to develop two major battery energy storage projects in Galati and Sibiu counties, contributing to the modernization of the national energy system and ...

The European Bank for Reconstruction and Development (EBRD) is considering lending EUR 50 million (USD 58.1m) to support a battery energy storage system (BESS) ...

State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage system at Iron Gate 2 (Portile de Fier 2) on the Danube. Located on the border with Serbia, it is the second ...

Romania's Ministry of Energy announces a €150 million funding for standalone battery energy storage systems, aiming to enhance the country's energy infrastructure and ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar ...

The European Bank for Reconstruction and Development (EBRD) is considering lending EUR 50 million (USD 58.1m) to support a battery energy storage system (BESS) ...

A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment ...

Romania's Ministry of Energy has reached two additional milestones under the National Recovery and Resilience Plan (PNRR) related to battery storage capacities and photovoltaic panel production.

Romania's Ministry of Energy has reached two additional milestones under the National Recovery and Resilience Plan (PNRR) related to battery storage capacities and ...

A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list ...

On December 17, 2024, Romania's Ministry of Energy signed the final two contracts under the National Recovery and Resilience Plan (PNRR) for battery storage capacities, completing a ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's ...

With increasing penetration of variable renewable energy sources in Romania, grid flexibility and storage capabilities are becoming critical for stability. The shift by Electrica ...
