Romania monocrystalline silicon solar panel wholesale

Overview

What are monocrystalline solar panels?

Monocrystalline panels are easy to distinguish by the black color of the cells. Their efficiency today varies from 16 to 22%, which means that mono solar cells convert into direct current from 16% to 22% of the sunlight that they receive. That's the most popular type of panels — in fact, most top manufacturers don't even sell anything else.

Where to buy solar equipment in Romania?

Solarfeeds is the best place to buy solar equipment. You can browse top manufacturers of solar equipment through our online marketplace. If you want quality equipment at a reasonable price, we're your go-to partner. There are several seaports in Romania, including: If the need arises, you will not have a problem importing quality solar equipment.

What is the difference between monocrystalline and polycrystalline panels?

Monocrystalline or mono panels are the most reliable and efficient type, polycrystalline or poly panels are slightly cheaper, but less productive. Thin-film panels or flexible panels are special in a way that they are very light and bend well. Monocrystalline panels are easy to distinguish by the black color of the cells.
