## Overview

---

### What is Rwanda's Energy Sector?

The energy sector, as a driver of national growth, is of priority to the Rwanda government. It comprises of three subsectors; electricity, biomass and petroleum, and focus is on increasing efficiency in generation, distribution and consumption.

### Why is a parallel energy policy approved in Rwanda?

As the Government of Rwanda is promoting alternative sources of electricity such as solar home systems, a parallel policy has been approved to encourage people to make productive use of the power on the national grid, in order to bridge the demand-supply imbalance, while making economic sense of future energy investments.

### How is the electricity system managed in Rwanda?

The entire grid system is being managed using the Supervisory control and data acquisition (SCADA) system. To date, 51% Rwandan households have access to electricity, connected to the national grid (37%) or through off-grid systems (14%).

### What are Rwanda Energy Group and EDCL?

Rwanda Energy Group is the implementing Company for energy sector in Rwanda, providing technical assessment, cooperation, and Power Purchase Agreements. It has two subsidiary companies: EDCL and EUCL.

### How has off-grid technology boosted Rwanda's capacity to avail electricity to more people?

The innovation of off-grid technologies has greatly boosted Rwanda's capacity to avail electricity to more people. Rwandan households have access to electricity. of the available electric energy is imported while the rest is domestically generated.

Does Rwanda have universal electricity access?

The Government of Rwanda (GoR) universal electricity access by considerable progress towards that. Electricity access has increased from 19% in 2014<sup>1</sup> to more than 75% in 2022.<sup>2</sup> EnDev Rwanda, active since 2009, has contributed to the government's endeavours on innovative approaches to support the development of new markets.
