

PDEOZE PowerContainer

Selling price of new solar modules in Vietnam

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

Solar panels are priced at 4,000 VND/W, with the actual cost influenced by various factors such as capacity, quality, brand, and purchase location. Here are the specific prices for our solar panels: How much does a solar project cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects.

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

Where can I buy solar panels in Vietnam?

Vietnam's domestic solar panel distribution network has evolved into a sophisticated system serving both residential and commercial markets. Major distributors like Dien Quang Group and Rang Dong have established nationwide networks with over 2,400 retail outlets and service centers.

Does Vietnam have a solar panel market?

Vietnamese solar panel production capacity has grown from 2.5 GW in 2019 to an impressive 18.7 GW by 2024, representing a 648% increase in just five years. This remarkable growth has positioned Vietnam as the fourth-largest solar panel exporter globally, capturing approximately 12% of the worldwide market share.

What is the growth rate of the Vietnam solar panel industry?

This represents a compound annual growth rate (CAGR) of 7.87% from 2025 to 2033. This article delves into various aspects of the Vietnam solar panel industry, including its current trends, drivers of growth, market segmentation, and competitive landscape.

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals. 2. What challenges is Vietnam's solar power sector facing?
