Serbia energy storage system lithium battery company

Overview

ElevenEs, a European leader in Lithium Iron Phosphate (LFP) batteries, manufactures the EDGE cobalt- and nickel-free cells in Serbia. Founded in 2021, their sustainable, high-performance batteries serve electric vehicles and large-scale energy storage, backed by Al Pack Group and EIT.

ElevenEs, a European leader in Lithium Iron Phosphate (LFP) batteries, manufactures the EDGE cobalt- and nickel-free cells in Serbia. Founded in 2021, their sustainable, high-performance batteries serve electric vehicles and large-scale energy storage, backed by Al Pack Group and EIT.

Serbian battery developer ElevenEs is finalising a project for the construction of a mega factory that will produce Lithium Iron Phosphate (LFP) batteries in the country's northern city of Subotica, CEO Nemanja Mikac told SeeNews. "The ElevenEs team is already working on increasing the production.

Serbia's transmission system operator Elektromreža Srbije received two grid connection applications for battery energy storage systems. They are the first energy storage projects in the country. Investments in battery energy storage systems (BESS) is ramping up around the world and Serbia is now.

The Jadar lithium project represents one of Rio Tinto's most significant strategic investments in the rapidly evolving battery metals sector. Located in western Serbia, this project has gained continental recognition with the European Commission designating it as one of 13 strategic new critical.

A gigawatt-scale factory producing lithium iron phosphate (LFP) batteries for the transport and stationary energy storage sectors could be built in Serbia, the first of its kind in Europe. The first step on the road to today's Li-ion battery was the discovery of a new class of cathode materials.

The European Union's designation of the "Jadar" lithium project as strategic for critical raw materials opens new opportunities for Serbia, positioning it not only as a lithium producer but also as a potential key player in Europe's battery manufacturing value chain. Both EU and Serbian officials.

ElevenEs, a European leader in Lithium Iron Phosphate (LFP) batteries, manufactures the EDGE cobalt- and nickel-free cells in Serbia. Founded in 2021, their sustainable, high-performance batteries serve electric vehicles and large-scale energy storage, backed by AI Pack Group and EIT InnoEnergy.
