# **Slovakia Thermal Power Storage Frequency Regulation Project**

## Overview

---

To tackle these challenges, Greenbat and Pixii initiated a project, facilitated by MTS spol. s r.o., Pixii's exclusive representatives for Slovakia, Czech Republic, and Hungary, to install and certify a battery energy storage system (BESS) for primary frequency regulation.

To tackle these challenges, Greenbat and Pixii initiated a project, facilitated by MTS spol. s r.o., Pixii's exclusive representatives for Slovakia, Czech Republic, and Hungary, to install and certify a battery energy storage system (BESS) for primary frequency regulation.

The concept is called pumped thermal energy storage (PTES) – a technology that converts electricity into thermal energy and, when needed, back into electricity. Simply put, the principle is similar to that of pumped-storage hydroelectric plants, such as Čierny Váh in Slovakia. When there is surplus.

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary frequency regulation (FCR) in the V4 countries. This collaboration marks a significant milestone in enhancing grid stability and.

AKRON, Ohio, July 31, 2025 /PRNewswire/ -- Echogen Power Systems is proud to announce that its strategic partner, Westinghouse Electric Company, has signed a Memorandum of Understanding (MoU) with Vodohospodárska Výstavba (VVB) to plan the development of Europe's first grid-scale pumped thermal.

Echogen Power Systems declared that its strategic partner, Westinghouse Electric Company, has signed a Memorandum of Understanding (MoU) with Vodohospodárska Výstavba (VVB) to work together to build Europe's first grid-scale pumped thermal energy storage (PTES) system in Slovakia. This initiative.

Echogen Power Systems has announced that its strategic partner, Westinghouse Electric Company, has signed a Memorandum of Understanding (MoU) with Vodohospodárska Výstavba (VVB) to plan the development of

Europe's first grid-scale pumped thermal energy storage (PTES) system in Slovakia. This.

regulation of a gas turbine in western Slovakia. Energodata, a provider of ancillary grid services in Slovak frequency regulation (FCR) in the V4 countries. This collaboration marks a significant milestone in enhancing grid stability and accelerating the transition to renewable sources. The.

## Slovakia Thermal Power Storage Frequency Regulation Project

---

The planned facility in Slovakia will be the first of its kind in Europe, providing gigawatt-hour-scale energy storage capacity. It will store surplus electricity generated by ...

This landmark project marks a significant milestone in the global transition to resilient, low-carbon energy infrastructure.

Frequency Regulation of Thermal Power Units Assisted by Battery Energy Storage System Published in: 2021 IEEE/IAS Industrial and Commercial Power System Asia (I&CPS Asia)

The proposed plant in Slovakia will be the first of its type in Europe and will be able to store energy on a gigawatt-hour scale. During peak demand, it will take excess electricity from ...

Energy storage battery thermal management new energy storage information To ensure the working temperature environment of batteries at an ultra-high discharge rate of 5 C, this work ...

It is now being used to help the plant comply with new European secondary frequency control regulations for automatic frequency restoration reserve (aFRR). The regulation went into effect at the ...

Echogen, a pioneer in supercritical carbon dioxide (sCO<sub>2</sub>)-based PTES technology, is collaborating with Westinghouse to deploy long duration energy storage (LDES) solutions ...

To tackle these challenges, Greenbat and Pixii initiated a project, facilitated by MTS spol. s r.o., Pixii's exclusive representatives for ...

Energy storage battery thermal management new energy storage information To ensure the working temperature environment of batteries at an ultra-high discharge rate of 5 C, this work ...

To tackle these challenges, Greenbat and Pixii initiated a project, facilitated by MTS spol. s r.o., Pixii's exclusive representatives for Slovakia, Czech Republic, and Hungary, ...

Echogen, a pioneer in supercritical carbon dioxide (sCO<sub>2</sub>)-based PTES technology, is collaborating with Westinghouse to deploy long duration energy storage (LDES) solutions worldwide.

This landmark project marks a significant milestone in the global transition to resilient, low-carbon energy infrastructure.

It is now being used to help the plant comply with new European secondary frequency control regulations for automatic frequency restoration reserve (aFRR). The ...

Slovakia may get Europe's first thermal battery A new project could turn electricity into heat - and back again - helping the grid stay balanced and green.
