## Overview

---

What if I have a question about a solar project?

If you have a question about any project information, email [solar@ee.doe.gov](mailto:solar@ee.doe.gov). Solar energy is the fastest growing and most affordable source of new electricity in America. As the cost of solar energy systems dropped significantly, more Americans and businesses are taking advantage of clean energy.

How does a solar roof & solar panel work?

Solar Roof and solar panels capture and convert sunlight directly into energy. Powerwall stores this energy which can be used to power your home. Find the answers to your technical and general questions related to Tesla energy products. Tesla offers an affordable and efficient energy storage option for your home.

Why should you buy solar panels from Sunrise company China?

High-power and high conversion Sunrise modules cover the full size of the market and calmly respond to the customized market demand. You can find the solar panels you want in Sunrise company China. Solar cells directly convert light energy into electrical energy through a photoelectric effect or photochemical effect.

What are the benefits of a community solar system?

Solar energy creates household savings. Solar owners can reduce their energy bills with savings that will accrue for the lifetime of the system. Community solar can provide savings for those who rent their homes or whose roofs aren't suitable for solar panels. Solar deployment generates economic opportunities.

How does solar power benefit the environment?

Solar power benefits the environment. Adopting renewable energy helps to improve air and water quality and helps the country reduce greenhouse gas

emissions that exacerbate climate change. DOE partners with national labs to develop innovations that lower the costs of solar energy.

What is a solar resource database?

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.
