

## **PDEOZE PowerContainer**

# **Solar container prefabricated cabin manufacturing company**

## Overview

---

What is a prefabricated container house?

Prefabricated container houses are also called prefabricated containers or prefab containers. They are prefabricated structures produced in an industrialized way. All components of these container houses are prefabricated in factories and then transported to the final site for rapid assembly.

What is a standard prefab container?

Our standard prefab containers are built with sturdy steel and 50mm rock wool insulation sandwich panels. They are usually equipped with doors, windows and complete power systems. We know that not all projects are suitable for standard container units. Therefore, we also provide customized designs to meet the specific needs of different projects.

What is a container house?

They are prefabricated structures produced in an industrialized way. All components of these container houses are prefabricated in factories and then transported to the final site for rapid assembly. This efficient construction mode shortens the construction period.

Can you create a living space using prefab container units?

You can create a living space using standard prefab container units. They can be formed into 2 or 3 bedrooms. Of course, we can also create it using expandable containers. Expandable container homes are fully customized container frames.

How do container houses work?

All components of these container houses are prefabricated in factories and then transported to the final site for rapid assembly. This efficient construction mode shortens the construction period. At the same time, it reduces the

requirements of the external environment for on-site construction.
