Solar energy system application in Croatia

Overview

Croatia plans to allocate €25 million (\$25.7 million) for public sector solar plants and heat pumps, alongside a €10 million residential solar tender, as part of a €652 million renewable energy and decarbonization package.

Croatia plans to allocate €25 million (\$25.7 million) for public sector solar plants and heat pumps, alongside a €10 million residential solar tender, as part of a €652 million renewable energy and decarbonization package.

Starting January 1, 2026, Croatia will introduce a major change for new solar energy users — ending the current generous net metering system and replacing it with a new net billing model. This shift will significantly impact the financial returns of home solar installations and reshape how.

Croatia plans to allocate €25 million (\$25.7 million) for public sector solar plants and heat pumps, alongside a €10 million residential solar tender, as part of a €652 million renewable energy and decarbonization package. Croatia plans to launch two solar tenders in 2025, according to the.

High interest among Croatian citizens in subsidies for installing solar power plants for self-consumption has prompted the Environmental Protection and Energy Efficiency Fund to pause the application process. The Environmental Protection and Energy Efficiency Fund (FZOEU) has announced that it will.

Croatia is on pace to surpass 1 GW of solar power by 2025, thanks to a surge in installations and supportive government policies. This growth is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation.

The Croatian government is harnessing the power of solar energy, planning to allocate a noteworthy €25 million specifically for the development of solar plants and heat pumps across the public sector. This funding is indicative of Croatia's commitment to an eco-friendly future. Complementing this.

Croatia offers many opportunities for developments in the renewable energy sector, particularly solar energy. The country has one of the highest

insulations in the EU, between 2000 and 2700 hours of sunshine a year. With these potentials, Croatia could become one of the most significant producers.

Solar energy system application in Croatia

Access a live Croatia Solar Photovoltaic (PV) Market Size and Trends by Installed Capacity, Generation and Technology, Regulations, Power Plants, Key Players and Forecast, 2021 ...

Croatia plans to launch two solar tenders in 2025, according to the country's indicative annual publication plan for the year, which is now available on the Ministry of ...
