Solar panels installed in Estonia

Overview

Estonia added a record 513 MW of new solar capacity in 2024, bringing its total installed PV capacity to more than 1.3 GW, according to the Estonian Chamber of Renewable Energy (Eesti Taastuvenergia Koda). Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

What's new at Kirikmäe solar park in Estonia?

With an installed capacity of 77MW, the Kirikmäe solar park doubles the capacity of the previous 'largest' plant in Estonia. Image: Evecon. Estonian energy company Evecon and French asset manager Mirova have reached operational status at a 77.53MW solar park in Estonia.

How much solar radiation does Estonia produce a year?

In Estonia, the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m², 85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.

How much solar power does Estonia have in 2022?

That makes another record-breaking year for solar on the continent, with a total of 10 GW more capacity added than expected. Regarding solar power per capita, Estonia has emerged as one of the new leaders. The country is ranked 6th among 27 EU members, with 596 Watt per capita in 2022, jumping from 405 in 2021.

Will Estonia be fully solar powered by 2030?

Estonia has seen a significant increase in its solar power capacity in 2022,

becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it now aims to be fully green-powered by 2030.

Will Estonia build 84MW solar-plus-storage portfolio in Latvia?

Earlier this year, the Estonian company partnered with Clean energy investment company Niam Infrastructure to build an 84MW solar-plus-storage portfolio in Latvia. The portfolio would be carried out in two phases, with the construction of 40MW of solar PV across six sites in a first phase.
