Somalia mobile power station electricity price

Overview

What is the price of electricity in Somalia?

Somalia, September 2022: The price of electricity is 0.000 U.S. Dollar per kWh for households and 0.000 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

Does Somalia have a power grid?

There is no national power grid. Diesel generators are the primary source of electricity. Most generators and distribution equipment are old and inefficient, resulting in a low-quality electricity supply. Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa.

What is the energy sector like in Somalia?

Somalia's energy sector is considered promising for growth and investment. Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks.

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.

How much power does Somalia have?

Current generation capacity is 106 megawatts, largely composed of expensive and pollutant diesel generators, though Somalia has great potential for solar and offshore wind power generation that can support a transition to green energy and reduce GHG emissions.

Who generates electricity in Somalia?

Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks. Private Somali companies generate approximately 128MW; most companies generate and distribute electricity independently.
