

PDEOZE PowerContainer

South Sudan power generation container project bidding

Overview

How to check the latest tenders in South Sudan?

Check the latest tenders in South Sudan with Bid Detail which serves as your reliable platform for worldwide tender information. Our platform includes the entire spectrum of government tenders within South Sudan together with international competitive bidding (ICBs) as well as procurement contracts and private sector tenders.

How does South Sudan import electricity from Sudan?

South Sudan imports a small amount of electricity from Sudan through a 32 MW/220 kV interconnector in Upper Nile State that distributes power to local customers through the Renk substation, but the supply from this line has been unreliable due to the power shortage in Sudan.

Where is South Sudan's electricity supply & distribution infrastructure located?

Most of South Sudan's functioning electricity supply and distribution infrastructure is located in Juba, with very little working equipment in other cities and rural areas.

Does South Sudan have a transmission network?

South Sudan does not have a transmission network, and even before the conflict, the power system consisted entirely of isolated distribution grids.

What is the energy access rate in South Sudan?

South Sudan has one of the lowest energy access rates in Sub-Saharan Africa and in the world. While 46 percent of Sub-Saharan Africa's population now has access to electricity, the energy access rate in South Sudan is estimated to be only 5.3 percent based on recent World Bank-funded primary research.

How much electricity does South Sudan need?

According to the government estimate, electricity demand (including unserved demand) in South Sudan is estimated to have increased to 800 MW in 2020, compared to an installed grid capacity of around 103 MW.
