Spain Emergency Energy Storage Power Supply Procurement

Overview

The Spanish government approved Royal Decree 7/2025 on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. This move responds to the large-scale blackout incident experienced by the country in April this year.

Spain is taking decisive action to modernize its power system and accelerate the shift toward a fully electrified economy. This week, the Council of Ministers approved a new royal decree designed to strengthen grid resilience, promote energy storage, and streamline regulatory procedures for.

Some of the measures approved in this new royal decree were previously proposed in another decree earlier this year. Image: Spain's Congress of Deputies. The Spanish government has approved a royal decree aimed at strengthening the power grid's resilience, robustness and stability in response to.

European Commission approves new 700 million aid scheme to boost energy storage in Spain [News] The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%. The European Commission has approved a.

Spain's ministry for the ecological transition said on Monday it has provisionally awarded EUR 839.7 million (USD 977.4m) in funds to 143 energy storage projects that will add about 2.4 GW of power and 8.9 GWh of capacity

to the national system. The incentive scheme, known as PINALM, is co-financed.

On April 28, 2025, Spain experienced one of the most severe blackouts in its modern history. Over 31 GW of load was disconnected, affecting millions across the Iberian Peninsula. The incident exposed vulnerabilities in grid inertia, voltage control, and coordination between transmission and distribution. Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain [News] The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

What is Spain's energy storage strategy?

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.

How can Spain transform its energy system into a climate-resilient country?

To ease financing, beneficiaries may request advance payments of up to 100% of the awarded aid, provided certain conditions are met. These efforts are part of a broader strategy to transform Spain's energy system into one that is more flexible, robust, and climate-resilient.
