# **Taipei new energy storage project construction**

## Overview

---

Jointly developed with Shinshin Credit Corporation, this milestone project significantly enhances grid stability and reliability, reinforcing Taiwan's transition to a more resilient energy infrastructure. The facility officially commenced commercial operations in March.

Jointly developed with Shinshin Credit Corporation, this milestone project significantly enhances grid stability and reliability, reinforcing Taiwan's transition to a more resilient energy infrastructure. The facility officially commenced commercial operations in March.

TAIPEI, March 12, 2025 /PRNewswire/ -- Billion Watts Technologies Co., Ltd., a subsidiary of Billion Electric Co., Ltd. (TWSE: 3027), has successfully completed the construction and commissioning of a 64MW/262.43MWh energy storage facility in central Taiwan. Jointly developed with Shinshin Credit.

Billion Watts Technologies, the solar and energy storage subsidiary of Taiwan's Billion Electric, has completed a 64MW/262.43MWh battery energy storage system (BESS) in central Taiwan. The project, which has been jointly developed with Shinshin Credit Corporation, a Taiwanese financial services.

Billion Watts advances energy digitalization and diversified storage applications, serving as a trusted partner for enterprise energy transition. Billion Watts Showcases Smart Energy Innovations at Energy Taiwan Billion Watts, the green-energy subsidiary of Billion Electric (TWSE: 3027), presented.

Pictured is the energy storage system installed at the Luyuan Substation, which is Taiwan Power Company's first energy storage project. (Photo: TPE Energy) Taiwan has recently witnessed a wave of cancellations in energy storage projects. Notable companies like Tung Ho Steel, North Star Petroleum.

Designed to stabilize Taiwan's grid while boosting renewable adoption, this initiative isn't just another battery farm – it's the Clark Kent of energy infrastructure, quietly saving the day behind the scenes. Who's Reading This?

Let's Break It Down While most projects slap batteries onto the grid.

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major.
