The effectiveness of Belgian industrial and commercial energy storage batteries

Overview

This project demonstrates that for commercial and industrial (C&I) users facing power capacity expansion needs, SCU's energy storage system is no longer simply a purchase of equipment, but a strategic investment with a high return.

This project demonstrates that for commercial and industrial (C&I) users facing power capacity expansion needs, SCU's energy storage system is no longer simply a purchase of equipment, but a strategic investment with a high return.

To address this challenge, energy storage systems are becoming a preferred solution for Belgian industrial and commercial customers to achieve power expansion and flexible energy dispatch. SCU provided a Belgian factory with six 100kW/215kWh commercial and industrial energy storage systems.

Battery energy storage systems (BESS) are no longer just a promising technology, they're now a cornerstone of Europe's clean energy transition. In 2025, the momentum gained in 2023 and 2024 continues, driven by falling cell prices, rising revenues, and a surge in developer activity across the.

On the last day of October, Belgian transmission system operator Elia published the results of the three CRM auctions, held simultaneously for the first time this year: Y-4, Y-2, and Y-1. Elia reported that all auctions - each with its own focus and time horizon - ran smoothly and on schedule.

Battery storage secured nearly all new-build capacity in Belgium's latest capacity market auctions, cementing its central role in the country's power supply plans through 2030. From ESS News Battery storage continues to dominate new capacity contracted in Belgium's capacity market auctions. In.

The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage landscape. With record growth in 2024 and new projections through 2029, the study highlights key market drivers.

Battery storage transforms this variability into opportunity — by reducing grid costs, increasing self-consumption, and stabilising on-site energy flows. For companies and installers, understanding this technology means unlocking new ways to protect margins and extend asset life. 2. Policy Backbone.
