

## **PDEOZE PowerContainer**

**The power cabinet in the base station is not functioning properly**

## Overview

---

Power Supply: The power adapter might be faulty, or the power outlet could be the problem. A loose connection between the base station and the power supply can also disrupt the power flow. What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

Why is my base station not turning on?

Hi, If the base station is not turning on when power is connected to either the DC-In jack or the mini USB port then there is a problem with the power supply circuit on the motherboard.

What is the operation and maintenance of a gu co-Cabinet base station?

Solution Guide 8 Operation and Maintenance Operation and Maintenance About This Chapter The operation and maintenance of the 3900 series GU co-cabinet base stations mainly involve alarm management, inventory management, routine maintenance, emergency maintenance, and software upgrade.

What is the routine maintenance procedure for the 3900 series Gu co-Cabinet base stations?

Page 58 8.4 Routine Maintenance The routine maintenance of the 3900 series GU co-cabinet base stations are performed separately on the GBTS part and NodeB part. The routine maintenance procedure is the same as that for the corresponding single-standard base station.

What is the output voltage of a communication base station?

Assume the output voltage of a communication base station's power system is 48V, with the LLVD threshold set to 40V. When the mains power fails and the

battery starts supplying power, the power system continuously monitors the output voltage through the voltage detection circuit.

How do I know if a base station is not tracking?

You check SteamVR and see that one of the base stations is not tracking. You peek at a base station and see a blinking red light. OH NO! If you still have the base station under warranty, no need to panic, this can happen, you just contact Valve/HTC support (depending where you bought it from) and they will offer you a replacement.

## The power cabinet in the base station is not functioning properly
