There are many EMS communication base stations in Finland

Overview

How do emergency services work in Finland?

The pre-hospital emergency care staff start treatment, if needed, already at the location where the patient has fallen ill or has been injured. An ambulance can be called throughout Finland by dialling the emergency number 112. The Emergency Response Centre will answer and, if necessary, send an ambulance to the location.

What are helicopter emergency medical services in Finland?

In Finland, helicopter emergency medical services are part of the prehospital emergency medical services. FinnHEMS Oy, which is a non-profit company owned by the State, is responsible for flight operations and the bases.

How do I call an ambulance in Finland?

An ambulance can be called throughout Finland by dialling the emergency number 112. The Emergency Response Centre will answer and, if necessary, send an ambulance to the location. The wellbeing services counties can provide prehospital emergency medical services themselves or together with another wellbeing services county.
