

## PDEOZE PowerContainer

# Türkiye s solar inverter export ranking

## Overview

---

Why is Turkey solar inverter market growing?

Turkey solar inverter market is expected to experience significant CAGR during the forecast period driven by technological innovations and government initiatives to promote renewable energy. Turkey solar inverter market size expansion is being fueled by advancements in technology including the more efficient and dependable inverters.

How much solar power does Turkey have in 2022?

World Population Review indicates that Turkey's solar power capacity reached 9,426 MW in 2022. Turkey boasts Europe's biggest manufacturer for vertically integrated module and it is also the site of largest solar installation in the continent which is the 1.35 GW PV power facility Kalyon Karapinar.

Which companies dominated the global inverter market?

Huawei's inverter segment also delivered an outstanding performance, with the two companies dominating the global market by a wide margin. Other enterprises, such as TBEA, Senergy, Deye and Ginlong (Solis), followed closely behind.

Which inverter companies were most impacted by the IPO market?

Other enterprises, such as TBEA, Senergy, Deye and Ginlong (Solis), followed closely behind. The capital market also recognised the inverter sector when SOFAR successfully went public in April, despite the cooling new energy IPO market. However, market fluctuations had a significant impact.

Which inverter companies bucked the trend?

However, inverter companies bucked the trend, becoming the industry's brightest spot. Leading firm Sungrow achieved revenue of 77.86 billion yuan and a net profit of 11.04 billion yuan attributable to the parent company, both of which were record highs, with year-on-year growth of 7.76% and 16.92%

respectively.

How will weak energy storage demand affect overseas leaders' rankings?

Weak household energy storage demand in Europe has put pressure on some enterprises' performance, leading to obvious changes in overseas leaders' rankings. As differences in market layout and technological R&D expand between companies, future performance differentiation will become more pronounced.
