# **Türkiye solar cell energy storage project**

## Overview

---

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.

Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.

Can Türkiye become a regional hub for battery technology?

"We believe Türkiye can become a regional hub for battery technology, and our government is committed to making this a reality," Tokcan said. These efforts will position Türkiye as a leader in energy storage innovation, fostering collaboration and supporting renewable energy goals.

Who is HLAs holding & sungen solar energy?

China Energy Engineering Corp. - CEEC, also known as Energy China, signed a deal through its CEOIC subsidiary with Turkish companies İhlas Holding and Sungen Solar Energy, which will participate with 10% each in a hybrid

renewable energy project.

Who is sungen solar energy?

Sungen Solar Energy is an engineering, procurement and construction (EPC) or construction management (EPCM) contractor. It is a Turkish-German joint venture partnership formed in 2013. The companies signed the agreement in Ankara. According to İhlas, it will hold 10%, as will Sungen, while CEOC will control 80% of a firm they plan to establish.

EVE Energy collaborates with Türkiye's Akxa Power Generation at Solarex Istanbul 2025, presenting high-efficiency energy storage systems to advance renewable integration and ...

Türkiye could utilize untapped capacities to advance solar energy momentum through floating, storage-integrated, hybrid and rooftop solar potential. The country has a pipeline of 33 GW in ...

The growing pipeline of storage-integrated and hybrid renewable projects, coupled with Türkiye's ambitious clean energy targets, continues to attract both domestic and international lenders ...

With over 2,700 hours of annual sunshine, Türkiye could power half of Europe if it harnessed solar energy like it brews Turkish coffee--slow, steady, and intensely. But here's ...

This innovative program will help establish and expand Türkiye's market for distributed solar energy and pilot a program for battery storage, in support of the country's National Energy Plan.

Turkey's government has approved a series of projects designed to boost the country's self-sufficiency in renewables technology - and lay the groundwork for exports.

Turkey's government has approved a series of projects designed to boost the country's self-sufficiency in renewables technology - and lay the groundwork for exports.

They are launching an investment of 250 MW in peak capacity - photovoltaics and battery energy storage systems (BESS). As part of the agreement, the companies intend to ...

Timeline: Energy storage investments will gain speed by the first quarter of 2025, with systems operational by early 2026. Objective: Store excess wind and solar energy for use ...

Ihlas Holding has signed a \$244 million agreement with China Energy International and Sungen Solar Energy to develop a large solar energy and storage project in Türkiye, ...

Timeline: Energy storage investments will gain speed by the first quarter of 2025, with systems operational by early 2026. Objective: ...

Turkey plans to build 80 GWh of capacity by 2030, aiming to become a regional center for battery technology production and investment.

Ihlas Holding has signed a \$244 million agreement with China Energy International and Sungen Solar Energy to develop a large solar energy and storage project in Türkiye, strengthening the country's clean ...
