US professional solar panel prices

Overview

In 2025, the average cost for a professionally installed rooftop solar system in America is typically between \$15,000 and \$30,000 before any tax credits or incentives are applied.

In 2025, the average cost for a professionally installed rooftop solar system in America is typically between \$15,000 and \$30,000 before any tax credits or incentives are applied.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

In 2025, the average cost for a professionally installed rooftop solar system in America is typically between \$15,000 and \$30,000 before any tax credits or incentives are applied. While that’s a wide range, this guide will break down exactly what that price includes, the key factors that determine.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

How much do solar panels cost on average?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends.

Hard costs involve the cost of the solar panels, solar inverters, solar batteries, racking systems, and electrical components. Soft costs involve labor, permitting, engineering, transportation, and sales margins. These indirect costs encompass a significant part of the final billing. For.
