# Urban distributed energy storage projects

## Urban distributed energy storage projects

---

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.

Newlab, NYCEDC, and Con Edison invite startups to pilot and validate innovative, regulation-compliant urban energy storage solutions in New York City--whether safer lithium-ion designs, ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Obtain a review of solar, storage, and other DER generation projects in New York State that received funding through NYSERDA. This dataset also includes detailed information each of ...

Figure 2 shows several energy storage technologies and their suitability for distributed applications including pairing with distributed solar photovoltaic (DPV) power generation.

Houston, TX - August 8, 2024 - Catalyze, a fully integrated developer and Independent Power Producer (IPP) of distributed renewable energy assets, today announced the launch of its first ...

Distributed energy storage can help support New York's clean energy transition while providing benefits to low-income communities. Deployment of energy storage could also ...

The cohort members and pilot projects were introduced at an event held at Newlab,

highlighting the vision for Resilient Energy, the work identifying energy challenges in NYC and how the cohort's pilot projects will address ...

Explore the key benefits of urban distributed energy storage systems for sustainability and efficiency.

The New York State Energy Research and Development Authority (NYSERDA) has launched a programme to incentivise residential and retail energy storage in the state, ...

The cohort members and pilot projects were introduced at an event held at Newlab, highlighting the vision for Resilient Energy, the work identifying energy challenges in NYC and ...
