

## **PDEOZE PowerContainer**

# **Vietnam distributed energy storage government subsidies**

## Overview

---

Households in Vietnam could receive up to VND 3 million (\$113.9) in investment capital for home solar-plus-storage systems installed for self-consumption, or a preferential loan of up to VND 40 million, under proposals from the country's Ministry of Industry and Trade. Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Is subsidy reshaping Vietnam's Electricity sector?

The rapid, subsidy-driven expansion has exposed gaps in planning and financial sustainability – laying the groundwork that is now reshaping the sector's trajectory. The state utility Vietnam Electricity (EVN) is now under financial strain due to the tariffs it set, which were as high as USD9.35 cents per kilowatt hour (¢/kWh).

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

What is Vietnam doing with feed-in tariffs?

Beyond the feed-in tariffs (FiTs), Vietnam is also offering policy incentives to catalyze investments in innovative energy solutions. According to Decree 58/2025/ND-CP, projects involving 100% green hydrogen or green ammonia can access preferential treatment, including:.

How does Vietnam encourage new energy power projects?

Vietnam is actively encouraging the development of new energy power projects through a set of preferential policies designed to incentivize investment in cutting-edge clean energy technologies.
