Where is Fluence & ACE Engineering's new energy storage factory located?

Recently, big news emerged in the energy storage sector: Fluence and ACE Engineering's new factory in Bac Giang Province, Vietnam, has officially commenced operations. This is no ordinary factory—it is an automated energy storage facility with an annual production capacity of up to 35 GWh.

What is a GWh energy storage factory?

This is no ordinary factory—it is an automated energy storage facility with an annual production capacity of up to 35 GWh. For the energy storage industry, this move represents both a new milestone in the strategic partnership between the two companies and a significant shift in the global energy storage manufacturing landscape.

Why did Fluence open a new energy storage facility?

"We believe the opening of this facility marks a crucial milestone in meeting the increasing global demand for high-performance energy storage solutions," Fluence (NASDAQ: FLNC) said.

What will Vietnam's power development plan look like in 2050?

Under Vietnam's Power Development Plan VIII, the country is looking to phase out coal-fired power generation by 2050 and increase solar power installed capacity to account for 34%, up from 23% in 2022. The Power Development Plan also forecasts that energy storage will increase to 300 MWh by 2030 and 26 GWh by 2050.

Does Trina storage have a battery energy storage system?

In energy storage, Trina Storage recently launched the 4.07MWh Elementa 2 battery energy storage system (BESS) that can fit inside a standard 20ft-long shipping container for easy transportation.
