Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems. Integrating storage in the electric grid, especially in areas with high energy demand, will.

As the world shifts toward renewable energy, these compact systems are stealing the spotlight—and for good reason. They’re like the Swiss Army knives of the energy world: versatile, reliable, and surprisingly powerful. Who’s Reading This?

Let’s Break It Down This article isn’t just for engineers in.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

What are small energy storage projects

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Similar to the bulk energy storage incentives, NYSERDA incentivizes commercial scale ESS projects that are either standalone, grid-connected, or paired with new or existing clean DERs.

Modern small energy storage systems typically use lithium-ion or flow batteries to store excess solar/wind energy. When the sun dips or the wind stops, these systems release stored power ...

The Fox Hills energy storage system, which is located next to our substation in the Rosebank neighborhood of Staten Island, furthers our clean-energy goals by storing 7.5 MW / 30 MWh of ...

As part of the Biden-Harris Administration's Investing in America agenda, the U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) today opened ...

Since 2019, 6,193 battery storage projects have been installed in New York state, according to data collected by the New York State Energy Research and Development Authority (NYSERDA). In

"We are excited to formally cut the ribbon on our 'Gunther' Bronx battery energy storage site," said David Arfin, NineDot Energy CEO and Co-founder. "Building battery storage sites in a dense ...
