## Overview

---

Like most countries in Central America, Costa Rica uses the A/B Type power outlet, which is made up of two horizontally aligned rectangular pins. It's the same outlet you will find throughout North America.

Like most countries in Central America, Costa Rica uses the A/B Type power outlet, which is made up of two horizontally aligned rectangular pins. It's the same outlet you will find throughout North America.

Then you might need a power adapter to keep your devices fully charged on the road. Here's everything you need to know about picking the right adapter for Costa Rica and bonus packing tips for other much-needed items! See our product selection criteria and guidelines here. Which power outlets do.

In Costa Rica, there are two types of power plugs and outlets: Type A and Type B. Both types are used in airports, hotels, restaurants, etc., but they differ in terms of shape. Type A: Type A plugs have two flat prongs on either side of the plug. Mostly used in the United States, Canada, Mexico.

Costa Rica outlets are plug types A and B. Devices with electric Plug A can fit in both Plug A and Plug B. Devices with Plug B can ONLY fit into Plug B electrical outlets. Note: Some places we stayed in Costa Rica only had Plug A power outlets. In that case, our Plug B devices would have required.

Costa Rica uses plug types A and B. Type A plugs are two-pronged and ungrounded, while Type B plugs are three-pronged and grounded. If your device has a Type A plug, it will fit into both Type A and Type B outlets. However, devices with Type B plugs only fit into Type B outlets. Is your device.

The two most important things to note with the power outlets in Costa Rica is that they are Type A and B. If you come from a country that uses these plug types, you will not need an adapter. What power plugs and outlets are used in Costa Rica?
