Overview

Will Morocco launch 5G cellular technology?

Morocco is set to launch its fifth-generation (5G) cellular technology, as announced by the Minister Delegate to the Head of Government, in charge of Digital Transition and Administrative Reform, Amal El Fallah Seghrouchni.

Will Morocco launch 5G in 2023?

The general guidelines note for the development of the telecom sector, adopted by the National Agency for Telecommunications Regulation (ANRT) in 2019, specified conditions for the launch of 5G in Morocco in 2023. Morocco is still in the 5G evaluation, testing and trial stage, leaving the launch postponed to a later date.

Will Morocco launch 5G cellular technology?

Morocco is set to launch its fifth-generation (5G) cellular technology, as announced by the Minister Delegate to the Head of Government, in charge of Digital Transition and Administrative Reform, Amal El Fallah Seghrouchni.

Which bands should be used for 5G in Morocco?

In Morocco, we would recommend that the 800 MHz (CDMA) and 3500 MHz (BWA) bands are examined to determine their potential for 5G. We understand that the 3500 MHz band is already being studied for 5G.

How long does it take to build a 5G network in Morocco?

Studies are currently being conducted to propose the conditions and modalities for operating 5G networks in the Kingdom in order to identify and prepare the target frequency spectrum rearrangement schemes. As 4G took 10 years, the construction of the 5G network in Morocco for a wide deployment throughout the country could take years.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.
