

## **PDEOZE PowerContainer**

# **What is the tax rate for wind power generated by communication base stations**

## Overview

---

Today it's a 6% base or 30% if you meet prevailing-wage & apprenticeship (PWA) rules (or qualify for the small-project exception), with potential +10 pts bonuses for domestic content and energy-community siting. What are tax credits for wind & solar power?

Tax credits supporting investment in wind and solar electric power are complex, and claiming those credits can involve parties beyond the investor and the federal government. In the case of transferred tax credits, the business that buys the tax credit may also be involved.

How do tax rules affect a power generating facility?

Tax rules require taxpayers to capitalize and depreciate the cost of acquiring an asset (such as a power generating facility) that provides long-term benefits. When the ITC is claimed, the amount of the investment that can be deducted for depreciation is reduced by 50 percent of the amount of the tax credit.

How do tax credits affect energy investment?

Because investment in wind and solar power structures is a small share of total economywide investment, the tax credits have a small effect on CBO's estimates of the overall user cost of capital. Modeling the Electric Power Sector Using CBO-ReEDS.

Do European countries rely on Windfall profits taxes?

Even though energy prices have declined from their peak, some European countries continue to rely on windfall profits taxes—a one-time tax. A tax is a mandatory payment or charge collected by local, state, and national governments from individuals or businesses to cover the costs of general government services, goods, and activities.

How much do businesses invest in wind and solar power structures?

Investment in wind and solar power structures, however, is a small share of economywide business investment. In CBO's January 2025 baseline projections, business fixed investment averages about \$4 trillion per year over the 2024–2026 period; projected investment in wind and solar power structures amounts to about 1 percent of that total.

Would higher natural gas prices lead to more investment in wind & solar?

If higher-than-expected natural gas prices led to more investment in wind and solar power, then the amount invested (in dollars) and the capacity installed would both increase, as would the cost of the tax credits. But capacity can decline without reducing the credits' cost.
